Software engineer with more than six years of experience designing and delivering reliable web, mobile, cloud, and AI-enabled products. I combine strong foundations in systems programming with full-stack engineering to translate complex business and technical requirements into scalable, maintainable solutions. My work spans software architecture, backend services, modern user experiences, data-intensive applications, AWS deployments, performance optimization, and technical leadership, with a consistent focus on code quality, operational reliability, and long-term product value.

TECHNICAL SKILLS

Languages

C++, C, Java, Python,
JavaScript, TypeScript, SQL

Full stack

MERN, React, React Native,
Node.js, Express.js, Flask,
Spring Boot, REST APIs

AI & Data

Machine Learning, NLP, AI
applications, PostgreSQL,
MySQL, Redis

Web & Cloud

HTML, CSS, Bootstrap,
TypeORM, Docker, AWS, Git,
CI/CD

EDUCATION

BS Software Engineering 2019 to 2023

Capital University of Science and Technology
CGPA 3.89 / 4.00 · Silver Medalist

AREAS OF INTEREST

- Artificial Intelligence, Machine Learning & Natural Language Processing
- Distributed Systems & Cloud Architecture
- Backend Engineering & Data-Intensive Applications
- Developer Tooling & Engineering Productivity
- Product Engineering & Scalable Platform Design

PROFESSIONAL EXPERIENCE

Senior Software Engineer / Developer

2024 to now

Current Position

Designing and shipping scalable web platforms, backend services, and AI-enabled features while owning system architecture, code quality, cloud deployments, performance, and technical mentoring across the delivery lifecycle.

Lead Software Engineer / Developer

2023 to 2024

New Avenue

Led end-to-end product delivery, translating business requirements into maintainable full-stack and cloud solutions while guiding architecture, code reviews, API design, releases, and day-to-day technical direction.

Freelance Software Engineer / Developer

2019 to 2023

Independent

Delivered web and mobile products across varied industries, taking work from discovery and system design through full-stack development, API integrations, database architecture, deployment, optimization, and long-term support.

SELECTED PROJECTS

GoHosty

[Website ↗](#)

One workspace for every short-term rental operation

An all-in-one short-term rental operations platform that centralizes OTA bookings, availability, guest messaging, dynamic pricing, cleaning workflows, payments, and owner reporting in one dependable workspace.

MongoDB · Express.js · React · Node.js · REST APIs

MoneyVote Quest

[Website ↗](#)

Financial literacy learned through real decisions

An interactive financial literacy and civic learning platform where young people manage budgets, navigate economic crises, debate policy choices, vote as teams, and see the impact of their decisions through live results.

MERN · Interactive simulations · Live results · Data visualization
